

Research Fellow Position

Laboratório de Proteómica, Departamento de Genética, Instituto Nacional de Saúde Dr Ricardo Jorge, INSA-I.P.- Lisboa

To collaborate in the project: “TRANSLATING PROTEOMICS AND BIOMARKER RESEARCH FINDINGS INTO THE CLINIC”

The present project is aimed at bringing together expertises in the major methodologies of PROTEOMICS, to evaluate and validate biomarkers findings to the clinical application.

Research Fellow position is open to experienced candidates in liquid chromatography and mass spectrometry analysis. Practical knowledge of molecular biology and biochemistry techniques are advantage. The applicant should work well as part of a group and be able to develop independent contributions.

To apply please send your *CV* and names of 2 references by email application, no later than **22th November 2009**, to:

Deborah Penque at deborah.penque@insa.min-saude.pt

Note: The pre-selected candidate (after *CV* evaluation and interview) will be instructed to apply her/his individual application to INSA-IP – Scientific Research Fellowship Programme. The final decision for grant attribution will be of INSA/Fellowship Scientific Commission responsibility according to its pre-defined criteria. The value of fellowship is 745€/month for graduate or 1495€/month for pos-doc and is for one year renovated for 6 years in total, starting in January 2010.
